STEP Import For AutoCAD With Registration Code Free PC/Windows

STEP Import for AutoCAD is a step file import for AutoCAD. STEP files are created by CAD software like AutoCAD and provide 3D geometry data of solid models. The STEP format is a popular file exchange format for 3D data and is used by CAD software like AutoCAD. STEP Import for AutoCAD is a simple and fast way to import 3D geometry data from STEP files into AutoCAD. STEP Import for AutoCAD creates 3D curve objects corresponding to the edges in a solid model in the STEP file. These 3D curves are added to the current drawing, yielding the wireframe geometry of the solid in the STEP file. STEP Import for AutoCAD is very easy to use. Once installed, it must be loaded into the AutoCAD environment. There are simple instructions for this in the ReadMe file. Once loaded it adds new commands to AutoCAD's existing commands and a new submenu called "STEPImport" to the AutoCAD menu containing these newly added commands. The 'STEPImport' menu consists of the following commands: - STEPImport - Imports an STEP file - STEPImportHelp - Displays the STEP Import for AutoCAD help file - STEPImportRegister - Registers your copy of STEP Import for AutoCAD - STEPImportAbout - Displays the STEP Import for AutoCAD About box STEP Import for AutoCAD Documentation: User's Guide - Contains the most important information and how tos for STEP Import for AutoCAD STEP Import for AutoCAD Reference - Contains everything you need to know about STEP Import for AutoCAD Help - Displays the STEP Import for AutoCAD Help file Step Import for AutoCAD Tutorial - Contains a tutorial for STEP Import for AutoCAD STEP Import for AutoCAD FAQ - Contains a list of frequently asked questions about STEP Import for AutoCAD. STEP Import for AutoCAD Workspace - Opens the STEP Import for AutoCAD workspace STEP Import for AutoCAD Inspector - Opens the STEP Import for AutoCAD Inspector STEP Import for AutoCAD Tools - Opens the STEP Import for AutoCAD Tools STEP Import for AutoCAD - Opens the STEP Import for AutoCAD menu Imported Specification - Opens the STEP Import for AutoCAD Imported Specification window Imported Data - Opens the STEP Import for AutoCAD Imported Data window STEP Import for Auto

Automatically import geometric data from the STEP file format to AutoCAD IMPORT StepImport is the perfect solution to load 3D data from STEP files into AutoCAD. You'll receive sophisticated support and comprehensive documentation even if you are a beginner to CAD. StepImport StepImport exports geometry from STEP files to the same drawing as the sources. For each edge of the source file, the STEPImport plug-in creates a wireframe curve, which represents the outline of the edge. STEPImport also creates individual spline curves and faces based on the source files. StepImport STEPImport provides a GUI for easy drag-and-drop operation. You can export STEP files as-is, change their format, define their properties or register it in the STEPImport plug-in. StepImport If the tool is not registered with STEPImport, it can be downloaded and automatically registered at anytime. StepImport StepImport does not require any other components such as VEXTS or SOLIDWORKS products. It is all you need to convert STEP files into your AutoCAD drawing. StepImport StepImport offers a wide variety of options. It allows you to change the file format, link it to a user interface extension, register it and use several properties. You can export the edges, curves, faces and splines of the model. StepImport The STEPImport plug-in has a toolbox feature and a "Converter" function. The toolbox allows you to edit the STEP format files and use the "Converter" function to convert STEP files to DWG, DXF, DWG or DWF formats, as required. You can also save the STEP format in the format required by AutoCAD.
