In this study, we sequenced and characterized the complete mitochondrial genome of *Squalius chlorellus* for the first time. The circular mitogenome is 16,540 bp in length, including 13 protein-coding genes, 22 tRNA genes, 2 ribosomal RNA genes, and a control region. The overall base composition of the mitochondrial genome is 27.37% for A, 34.85% for T, 29.30% for C, and 8.56% for G, with an A + T content of 56.52%. The complete mitochondrial genome would provide useful genetic information for further population genetics and phylogenetics, and should serve as a useful tool to distinguish *S. chlorellus* from its congeners. We are returning to the U.S. in November, so we've been working on our packing list. We came up with some pretty bold lists, so we decided we'd share a few of the lists with you. To begin with, we've got a four-page checklist on how to pack your home before you leave. Whether you're traveling with kids or empty nesters, you'll be sure to make it over the border with everything in your house in one piece. Read: Declutter and Pack Before Leaving Home. Which brings me to my next big packing list: what to bring along with you when you're away from home. Whether you're on vacation, a business trip or out of town visiting a relative, we've got you covered for some of life's greatest moments. Read: What to Bring With You When You're on a Vacation or Away on Business. Since we'll be at our condo most of the time, we put together a list of the things we'll probably need. The first is having a power strip (we'll go more into why we love this at home), and then we come to our ultimate packing list: what you need to pack when you're traveling.
